

ENVIRONMENTAL POLICY 2023

Smartrad Creative Limited is a supplier of event services and products for events in the UK. Television, theatre & events throughout the UK have been supplied using our equipment and staff.

Smartrad Creative Limited is determined to serve the best interests of the community by protecting and actively promoting the improvement of the local environment.

The Company will lead by example in its own activities through the commitment to its Environmental Strategy and will aim to minimise the impacts of its activities.

It is determined, in partnership with event organisers, equipment manufacturers, local councils and the general public, to pass on the environment to future generations in a better condition than it is today.

Whilst promoting the success and safety of the event and, working towards the achievement of sustainable development, the Company will ensure that environmental priorities are integrated into the decisions it takes on all its services and will seek whenever it has a regulatory or influential role to:

1. make the most efficient use of energy;
2. reduce the need for movement of both people and goods and encourage walking, cycling and the use of economic transport as alternatives to the private car;
3. minimise and, where possible, eliminate, all forms of pollution;
4. avoid waste and encourage the appropriate conservation, re-use and recycling of resources;
5. protect and enhance the diversity of wildlife and the countryside;
6. conserve and enhance the character and quality of the environment;
7. avoid environmental damage by assessing and monitoring environmental impacts rather than responding to them afterwards;
8. promote a sense of responsibility and understanding for the environment and participation in environmental issues, by raising staff awareness, by education, information provision and open consultation with the local councils;
9. work in partnership with our contractors, suppliers and others to comply with all regulatory requirements at a local, national, European and international level and to encourage continuous improvement in environmental performance and practices;
10. protect the health and well-being of all residents of, and visitors to, the areas where we work and to improve and safeguard the quality of the environment in which they live, work, or spend their leisure time;
11. review and where possible, improve our performance each year with positive action and any areas of non-compliance.

Company Statements.

1. We recognise that our operations have an effect on the local, regional and global environment.
2. As a consequence of this, the management is committed to continuous improvements in environmental performance and the prevention of pollution.
3. Environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance.
4. We will implement our policies through a coordinated environmental management system.
5. The company will use environmentally safe and sustainable energy sources to meet our needs.
6. We will invest in improved energy efficiency of products we use and sell.
7. The company considers the environmental impacts of its products at all stages of their life cycle - from design, to manufacturing, customer use, and finally disposal.
8. The company will seek to address its impact on the environment through the adoption of a sustainable procurement policy. We will conserve resources through efficient use and careful planning.
9. The company maintains that a primary part of its corporate environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible.
10. We will minimise waste, especially hazardous waste, and recycle materials whenever possible. We will dispose of all waste through safe and responsible methods.
11. We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.
12. We will implement our policies through guidelines and training. The company will set environmental targets and goals designed to improve our environmental performance.
13. Through coordinating.; route planning and delivery schedules this company seeks to realise the dual benefits of reduced fuel consumption and lower exhaust emissions.
14. The company is committed to reducing emissions from industrial and power generation processes.

We will conduct an annual self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations.

Martin Radmall

Director

I have read and understood the Environmental Policy.
